

## SCS INTERNATIONAL MALI | Exports

SCS International is a Malian company in operation since 2007, specializing in the export by sea, of fresh mangoes, to Europe and Africa (Morocco, Gabon).

Our products are premium quality and intended to be ripened and displayed directly in the supermarkets such as Albert Heijn in the Netherlands, Carrefour in France, Lidl in Germany, Tesco in the United Kingdom.

### MANGO SUPPLY

We are supplied by hundreds of small farmers spread all over the production areas, which are Bamako, Koulikoro and Sikasso. They are organized into a cooperative, specialized in Mangoes.

Throughout the year, the orchards are monitored by our quality control team, and certified to meet the European food safety standards. In 2013, 137 producers were certified GLOBAL GAP, and 17 certified Organic. In 2014, this number should increase to 250.

The harvest is done by our own teams of harvesters, hired and trained to minimize damage to the fruit which are carefully transported and processed at the packing house.

### PACKAGING

We handle fruits at two packing stations in Bamako and Sikasso. Both stations are equipped with automatic lines and cold rooms, certified to international standards including Global Gap and Organic. With the two packing stations, we can produce an average of two to three containers per day.

We reached the highest quality due to the skills of our well trained teams. We employ more than 250 seasonal workers hired locally trained and supervised by a team of experienced professionals.

Our main brands are: Soleil du Mali (exclusivity for Bakker in the Netherlands), Mali Mango and Eurafrique.

### LOGISTICS AND TRACEABILITY

We have the logistics network to transport our products from the packing station to the port of embarkation of the containers, Dakar and Abidjan. This reduces the transit time of containers, and the cold chain is monitored by temperature recorders.

Information on traceability and other details of the shipments are available to our customers by a detailed system of codes and tracking sheets, sharing information on fruits, their origin and the conditions of their transport from the orchard to the final consumer.

Our products are available in six countries in EU : The Netherlands, Belgium, France, Germany, Spain and the United Kingdom.

We aim to build with our clients sustainable relationships based on trust. This is the case for our main Client Bakker, in the Netherlands, who supported our activities since the beginning and with whom we continue to grow and improve our activities.
