

SCS International | Corporate social responsibility

At SCS INTERNATIONAL, our attention and development of the CSR Policy towards the stakeholders, forms part of the success of our activities.

Our strategy is based on the active participation of the stakeholders throughout the value chain. It is important for us that they benefit from their part of the added value.

Consequently, our CSR policy includes Social, environmental and food safety aspects for a sustainable development of our activities.

SOCIAL

Our mission is to value all the actors of the supply chain, particularly rural populations that form the heart of any agricultural enterprise. By establishing direct contracts with the farmers and certifying their fields, we allow them to increase their incomes and thus improve their living conditions.

In the area of our own production site, managed by our subsidiary, SCS FF PRODUCTION, we commit to bring to local populations, production technologies, free access to water and electricity through mechanized boreholes and solar panels. We also have a social plan including the creation of a foundation financed at 1% of our annual turnover.

Our goal is also to create optimal working conditions for our employees including rural people and women (more than 70%).

We commit to the BSCI (Business social compliance Initiative) code of conduct, aiming the improvement of working conditions, by the respect of national and international labor laws and standards.

Principles of BSCI code of conduct in pictograms

ENVIRONNEMENT AND FOOD SAFETY

At SCS International, we are minimising the environmental impact of our activities. Thus, we apply strict environmental policies prohibiting the use of pesticides and chemical products. We prevent waste of energy by developing the use of eco-friendly technologies such as solar electricity and drip irrigation.

We assure our clients that they will be supplied a safe product, respectful of the food safety standards. Our products and handling facilities are certified GLOBAL GAP and Organic. We are implementing the Tesco Nurture Standard, relative to the specifications of the British supermarkets Tesco, and including major ecological initiatives.
